SE 216 – SOFTWARE PROJECT MANAGEMENT
REQUIREMENTS DOCUMENT

PROJECT NAME: A Secure Social Marketplace & Commission Platform

GROUP MEMBERS:

REQ. #	FUNCTIONAL REQUIREMENTS
1	User Registration: The system **must** allow users to register with email verification and select distinct Creator or Client roles and permissions
2	Profile Management: Creators **must** be able to build public profiles featuring portfolios, pricing, and mandatory expertise tags.
3	Customizable Forms: The system **must** support creator-defined order forms with various inputs and file uploads.
4	Commission Workflow: The system **must** provide structured status tracking from submission to delivery with enforced revision limits.
5	Escrow Payments: Client funds **must** be held in secure escrow and released upon client approval or automatically.
6	Internal Messaging: The system **must** feature an integrated chat system for communication throughout the entire commission lifecycle.
7	Content Protection (AI Shield): The system **must** provide optional adversarial noise processing (AI Shield) to block unauthorized AI training.
8	Advanced Discovery: Clients **must** be able to use attribute-based search and filtering by style, price, and tags for creator discovery.

9	Mutual Rating System: The system **must** support a two-way review and rating system visible on user profiles after order completion.
10	Dispute Resolution: The system **must** provide a moderator-led conflict resolution process with frozen escrowed funds.
REQ. #	**NON-FUNCTIONAL REQUIREMENTS**
1	Scalability: The system **must** support at least 1,000 concurrent users with 95% of requests under 2 seconds.
2	Performance: Search results **must** be loaded within 3s and AI detection completed within 5s.
3	Security: The system **must** implement AES-256/TLS encryption and PCI-DSS compliance for all financial data.
4	Availability: The system **must** guarantee 99.9% uptime through reliable cloud infrastructure
5	Asynchronous Processing: The system **must** use background job queues for heavy tasks (AI Shield) to ensure system stability.
6	Compliance: The system **must** maintain full adherence to GDPR and international data privacy regulations. .
7	Usability: The commission process **must** be streamlined into 5 steps or fewer for first-time users.

8	Compatibility: The system **must** ensure seamless performance across Chrome, Firefox, Safari, and Edge. .
9	Maintainability: The system **must** be built with a modular architecture requiring less than 20% codebase changes for new feature additions.
10	Auditability: The system **must** maintain detailed financial logs to support transparency and dispute resolution.
